

Melissa Sewell

**Senior Territory
Manager –
Houston
SpectraCell
Laboratories**

Ms. Sewell has fourteen years of experience in supporting healthcare providers in the area of functional medicine and wellness. She has also managed and assisted in the development of integrated wellness practices in the Houston area. SpectraCell Laboratories is a leading clinical laboratory specializing in personalized disease prevention and management solutions.

Through dedication to research and development, SpectraCell Laboratories is a pioneer in nutritional and cardiometabolic testing. The SpectraCell Solution supports optimizing patient outcomes by facilitating the prevention and early detection/diagnosis of deficiency and disease, while helping guide effective treatment options.

Ms. Sewell assists healthcare providers in implementing advanced lab testing to assess multiple areas of the diagnostic puzzle including micronutrient status, cardiovascular health, metabolic risk, inflammation, genetic predisposition, and hormone health. These testing solutions are indispensable for the evaluation of autoimmune and neurodegenerative conditions, cardiovascular risk, diabetes, cancer, endocrine balance, cognitive function, rate of aging, and general wellness.
